

# GENERATIVE ARTIFICIAL INTELLIGENCE

---

2024 WorkWonder Apprenticeship Program

# ABOUT

Use various AI platforms to design and create. AI can be used to create everything from websites and tech tools to art and has become an essential part of building and running a business. During this Deep Dive apprentices will use tools from Open AI, Playlab, Sora, Dali, and more to help design and build digital artifacts needed for work.

# WHAT YOU WILL LEARN

Apprentices will learn how to use design and various generative AI tools to solve problems and create useful products. They will learn how to accurately and appropriately leverage and manipulate AI to create their desired outcomes. They will also learn how AI is integrating into many different aspects of our lives from business to healthcare, to art.

# JOB DESCRIPTION

Apprentices will work with Blue Dot Education to design and create artifacts that are necessary for a modernized business. Items could include AI generated learning language models, website plugins, marketing materials, and general content creation and curation.

## **Expectations:**

Apprenticeship candidates should be self-motivated and willing to learn. In addition, you must be good communicators and collaborators and ready and willing to work with others. Comfortable asking questions, asking for help and receptive to feedback from different perspectives. Apprentices should display healthy workplace characteristics such as attending to all commitments on time and communicating with the lead and team ahead of time if a commitment is going to be missed.

# Meeting times

**MONDAY**

**1:00-2:30PM**

Bayha Group meeting

**TUESDAY**

**1:30-2.30PM**

Deep Dive session

**WEDNESDAY**

**THURSDAY**

**1:30-2.30PM**

Deep Dive session

**FRIDAY**

# Weekly activities

Work with the lead and each other to learn about and implement various generative AI tools. This includes sharing resources, articles, videos, podcasts, etc about new innovations in the industry as well as using AI to build and test needed items.

**KWAKU ANING**

# Deep Dive Lead

Hey everyone, my name is Kwaku Aning and I am:

- an educator
- a professional wonder(er)
- a connector
- an advocate for students
- looking to connect the dots between education, tech, art, agency, and the stuff that I am yet to understand

Currently I am the Director of the Center of Innovation and Entrepreneurial Thinking at the San Diego Jewish Academy but I have had the privilege to work in various roles within public charter and private schools over the past 22 years within education. In my current and previous roles I have had the privilege to work with students on various STEAM and Project Based Learning projects utilizing robotics, artificial intelligence, augmented reality, virtual reality, and projection mapping. One of the highlights of this work occurred in the fall of 2017 when I produced four short 360 video documentaries for the United Nations on Fijian youth and the effects of climate change.
